

# @pywrogn: The Päpsipunx except: Tired © CRASS

I cunt, believe it  
I can't believe it  
all my dreams are gone  
I can't believe it  
this bloody system  
has finally won  
I can't believe it  
I still can't believe it  
I can't believe it  
I can't believe it  
of anarchy  
commercial suicide  
in mtv  
Punk is lost  
I still can't believe it  
I can't believe it  
I still can't believe it  
to change everything  
and now we're going back  
to go boring, boring, boring,  
I can't believe it  
we started right here  
I still can't believe it  
I can't believe it  
I still can't believe it

1. Bäng your Hirn against the System
2. Tim Burners-Lee
3. I cunt, believe it
4. Tired

Bäng your Hirn against the system

Bäng your Hirn against the system  
Bang your Hirn, Bäng your Hirn  
get reborn start again and  
kill yourself to stop the pain  
Bang your Hirn, Bäng your Hirn  
Bang your Hirn, Bäng your Hirn  
Smoke cigarettes till you get cancer  
keep asking for the final answer  
paint a picture fall in love  
go to the bottom of and  
Bang your Hirn, Bäng your Hirn  
against the system

Tim Burners-Lee

The basic idea of Tim Burners-Lee was to merge  
the technologies of personal computers, computer networking  
and hypertext into a powerful and easy to use global information system.  
Of course, behind this apparent simplicity  
there is a set of ingenious design concepts, protocols and conventions.  
But the basic idea of Tim Burners-Lee  
was to merge the technologies of personal computers  
computer networking and hypertext  
into a powerful and easy to use global information system.  
And now you abuse this great idea.
